The 32 Variations on Sexual Orientation Chart - Explanation Guide

32 Variations on Sexual Orientation

Brain Input		Brain Output		Input + Output	
Perspective	Response	Perspective	Response	Sexual Orientation	
FEMALE	Holistic (Genetic complete dominance)	Holistic Consciousness/ Straight	Holistic	Feminine	Straight w/ feminine traits
			Dualistic	Masculine	Straight w/ masculine traits
			Unity	Bisexual	Straight w/ bisexual traits
			Hybrid	Polysexual	Straight w/ polysexual traits
	Dualistic (Genetic complete dominance)	Dualistic Consciousness/ Lesbian	Holistic	Feminine	Lesbian w/ feminine traits
			Dualistic	Masculine	Lesbian w/ masculine traits
			Unity	Bisexual	Lesbian w/ bisexual traits
			Hybrid	Polysexual	Lesbian w/ polysexual traits
	Unity (Genetic codominance)	Unity Consciousness/ Bisexual	Holistic	Feminine	Bisexual w/ feminine traits
			Dualistic	Masculine	Bisexual w/ masculine traits
			Unity	Bisexual	Bisexual w/ bisexual traits
			Hybrid	Polysexual	Bisexual w/ polysexual traits
MALE	Hybrid (Genetic incomplete dominance)	Hybrid Consciousness/ Polysexual	Holistic	Feminine	Polysexual w/ feminine traits
			Dualistic	Masculine	Polysexual w/ masculine traits
			Unity	Bisexual	Polysexual w/ bisexual traits
			Hybrid	Polysexual	Polysexual w/ polysexual traits
	Dualistic (Genetic complete dominance)	Dualistic Consciousness/ Straight	Holistic	Feminine	Straight w/ feminine traits
			Dualistic	Masculine	Straight w/ masculine traits
			Unity	Bisexual	Straight w/ bisexual traits
			Hybrid	Polysexual	Straight w/ polysexual traits
	Holistic (Genetic complete dominance)	Holistic Consciousness/ Gay	Holistic	Feminine	Gay w/ feminine traits
			Dualistic	Masculine	Gay w/ masculine traits
			Unity	Bisexual	Gay w/ bisexual traits
			Hybrid	Polysexual	Gay w/ polysexual traits
	Unity (Genetic codominance)	Unity Consciousness/ Bisexual	Holistic	Feminine	Bisexual w/ feminine traits
			Dualistic	Masculine	Bisexual w/ masculine traits
			Unity	Bisexual	Bisexual w/ bisexual traits
			Hybrid	Polysexual	Bisexual w/ polysexual traits
	Hybrid (Genetic incomplete dominance)	Hybrid Consciousness/ Polysexual	Holistic	Feminine	Polysexual w/ feminine traits
			Dualistic	Masculine	Polysexual w/ masculine traits
			Unity	Bisexual	Polysexual w/ bisexual traits
			Hybrid	Polysexual	Polysexual w/ polysexual traits

To understand the 32 variations chart we need to understand three things:

1. The effects of genetic dominance on the way the brain gathers and responds to information.
2. That anyone can have two different genders.
3. And what is meant by the terms *holistic* and *dualistic*.

Consider how genetic dominance affects flowers. Cross a red and white flower and we get one of four results: red, white, pink, or red and white. The genetic trigger that determines our brain's operating system also uses dominance to produce four different types.

There are three kinds of dominance: *complete*, *incomplete*, and *codominance*. In complete dominance, for example, the dominance is complete. We make our decisions based on either the management style of right hemisphere or that of the left. When dominance is incomplete, the two sides combine to form hybrid system of brain management; we are given a blend of the two to guide us. When the dominance we inherit is codominance, our operating system is cooperative; the two sides work as a unified team.

To understand the chart we also need to know that we can have two different operating systems guiding us, and therefore have two different genders. Here is why. Information that is *input* to the brain—brain input—is internalized. Our observations flow inward to the brain and shape who we are within the bounds of our skin—what we feel and think. Information that the brain *outputs*—through our actions, through our choices of what to believe and how to respond to something—is externalized. Output information shapes the world around us. What we know about others is mostly based on their responses, their information output.

Information input and information output are separate actions; therefore, they are subject to *separate* forces of genetic dominance. You can, for example, find that the operating system of your right hemisphere dominates the *input* of your information, and find that your left hemisphere dominates the *output* of information—your responses.

Holistic refers to the typical right-brain approach to understanding, one that views the whole of things, but whose detailed understanding is greatly limited. *Dualistic* refers to an approach to understanding that focuses in to obtain a more detailed understanding of what the right brain has discovered (and thus knows a lot about certain things), but whose holistic vision is greatly limited.
